

CEC21 Preliminary Programme

Day	Time (CET)	Title	Convenor(s)
Monday 4th	11:30-12:15	social interactive component	
	12:15-12:30	Break	
	12:30-1:30	PLENARY 1: Opening plenary	Thomas Bruhn & Miranda Böttcher & Mark Lawrence
	1:30-2:00	Break	
	2:00-3:00	Implementing net-zero targets - policy instrument planning for negative CO2 emissions	Matthias Honegger
		The Comparative Politics and Policy of Solar Geoengineering	Joshua Horton
		Natural Science Advances in SRM	Ben Kravitz
	3:00-3:30	Break	
	3:30-4:30	Beyond static human behavior: The driving and resisting psychological forces of Climate Engineering	Patrick Hancock
		Ethical and political challenges for research & implementation of Climate Engineering	Maximilian von Seckendorff
	4:30-4:45	Break	
4:45-5:30	social interactive component		
Tuesday 5th	10:00-10:45	social interactive component	
	10:45-11:00	Break	
	11:00-12:00	Broadening the context for climate engineering research: Lessons from interdisciplinarity	Nils Matzner
		Novel Natures: Strong interventions for the sake of nature conservation and climate change mitigation?	Tina Heger
		Pioneering SRM research in the Global South: results from the DECIMALS research projects	Andy Parker
	12:00-12:30	Break	
	12:30-1:30	Poster session	Miranda Böttcher
	1:30-2:00	Break	
	2:00-3:00	The role of fossil fuel companies in large-scale carbon removal	Holly Buck, Wim Carton
		Developing Solar Geoengineering Scenarios for Policy Research	David Morrow, Tyler Felgenhauer
		Getting Real about Playing God: A Multi-Faith Conversation on Climate Engineering	Laura Hartman; Fletcher Harper
	3:00-3:30	Break	
	3:30-4:30	Think local, act global	David Keith
		Incentivising negative emissions in societal context	Rob Bellamy
Ethics of Human agency in CE		Laura Hartman	
4:30-4:45	Break		
4:45-5:30	social interactive component		

CEC21 Preliminary Programme

Day	Time (CET)	Title	Convenor(s)
Wednesday 6th	10:00-10:45	social interactive component	
	10:45-11:00	Break	
	11:00-12:00	Blue Carbon: Exploring challenges and opportunities for climate engineering	Nadine Mengis
		How can we increase developing nation engagement in the solar climate engineering discussion?	Chris Lennard
		The new security politics of climate engineering	Duncan McLaren
	12:00-12:30	Break	
	12:30-1:30	PLENARY 3: Mapping the wider context	Thomas Bruhn, Nadine Mengis, Shin Asayama, Laura Hartman
	1:30-2:00	Break	
	2:00-3:00	Game session	Pablo Suarez
		A Practical vision of SAI deployment	Wake Smith
		Improving the representation of Carbon Dioxide Removal Technologies in Integrated Assessment Models.	Raphael Apeaning
	3:00-3:30	Break	
	3:30-4:30	The International Geoengineering Network - A Global / Multidisciplinary Expert Group on Opportunities and Risks	Michael Kleeman
		An informational briefing on US Federal Funding for NETs	Martin Bunzl
		A performative lecture on "the Anthropocene and (more-than-human) health"	Sybille Neumeyer
4:30-4:45	Break		
4:45-5:30	social interactive component		

CEC21 Preliminary Programme

Day	Time (CET)	Title	Convenor(s)
Thursday 7th	10:00-10:45	social interactive component	
	10:45-11:00	Break	
	11:00-12:00	Democracy in solar geoengineering governance	Sean Low
		Gender and Climate Engineering	Tina Sikka
	12:00-12:30	Break	
	12:30-1:30	PLENARY 4: Lessons from COVID-19 for Climate Change and Climate Engineering	Sean Low, Daniel Heyen, Shin Asayama, Jane Long, Sikina Jinnah and Pablo Suarez
	1:30-2:00	Break	
	2:00-3:00	Integrated assessment of solar geoengineering	Mariia Belaia
		Adaptation and climate engineering	Michael Thompson
		The Ethics of CDR Technologies	Hanna Schuebel
	3:00-3:30	Break	
	3:30-4:30	Governance and Public Engagement for Geoengineering Research – The Case of SCoPEX	Michael Kleeman, Rajul Pandya
		Test-driving a Toolkit for Carbon Removal Deliberation	Amanda Borth
		Climate Engineering Scenarios 2: Current insights and new directions	Edward Parson
4:30-4:45	Break		
4:45-5:30	social interactive component		
Friday 8th	10:00-10:45	social interactive component	
	10:45-11:00	Break	
	11:00-12:00	Strategies for building and sustaining meaningful public engagement in solar geoengineering research	Ambuj Sagar, Peter Frumhoff
		The Politics of Climate Engineering	Ina Möller
		Emergent ideas for climate engineering	Andrew Lockley
	12:00-12:30	Break	
	12:30-1:30	Climate Intervention in the Courts: A Moot Oral Argument Experiment	Tracy Hester
		Humor and Risk	Pablo Suarez
		An Overview of the U.S. National Academies Study “Reflecting Sunlight: Recommendations for Solar Geoengineering Research and Research Governanc	Chris Field, Laurie Geller
		Connecting Carbon Removal to the Sustainable Development Goals	David Morrow
	1:30-2:00	Break	
	2:00-3:00	PLENARY 4: Final town hall plenary	Andy Parker, Thomas Bruhn
3:00-3:15	Break		
3:15-4:30	social interactive component
